DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-9, 11-19 and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over www.biddersedge.com (Bidder's Edge) in view of McGovern et al. (McGovern).

Bidder's Edge is an auction search engine comprising an input field for buyers to enter a product identifier related to a product they desire, a method for monitoring a plurality of auction sites through electronic data interchange messaging, a method to compare and determine if the desired product is for sale on any of the auction sites, a system that notifies the buyer if the desired item is for sale with the current bid for the product, (this includes notification by e-mail) and a method for allowing the user to place a bid with the auction site. As disclosed by applicant on page 5 lines 9-10 the examiner interprets the "product identifier" to be any parameter of the desired product. In addition, the examiner interprets the limitation "monitoring" in claim one to mean checking by means of a receiver for significant content.

Bidder's Edge further includes an option to include a category identifier or description identifier with the product identifier to aid in the monitoring for the desired product. Bidder's Edge also includes a method to erase the product identifier from the site after the buyer has been notified that the desired product is for sale. Finally, Bidder's Edge includes a "Deal Watch" section that provides the user with a daily report, via e-mail of all auctions offering items that satisfy search criteria. Inherent to this feature is a database that stores the search criteria of the buyers desired products.

Art Unit: 3627

Bidder's Edge does not teach a method of scanning the database of desired products from the auction site, in order to determine a product desired by the buyers.

McGovern teaches a job search system where companies (sellers) input jobs (products) that they have available. Job seekers (buyers) submit input on jobs (products) they are interested in and if a match is found they are notified. Additionally, companies (sellers) can search, from the web site the database of jobs (products) desired by job seekers (buyers) to determine which jobs (products) are desired by the job seekers (buyers) (column 18; lines 39-51).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to search the desired product database of Bidder's Edge in the manner taught by McGovern in order to find potential markets for products sellers wish to sell.

Response to Arguments

Applicant's arguments with respect to claims 1-9, 11-19 and 21-23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3627

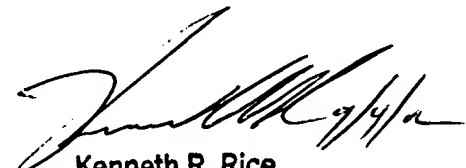

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
